

## Colo by the 'U': Colocation...On Your Terms

MOD Mission Critical has the largest offering of Managed Colocation and Colo by the 'U' worldwide. Colo by the 'U' provides customers in virtually every vertical with flexible, scalable and cost-effective Colocation options by the 'U', or single rack unit, in secure, controlled data center facilities across most major and emerging markets.

Unlike many major data center and colocation providers, MOD's dynamic Colo by the 'U' solution evolves with your business - and your budget. MOD understands that requirements change, which is why we offer scalable, flexible Colocation options that provide businesses with the right-sized Colocation solution to support customers' ever-changing business needs.

## Why Pay for What You Don't Use?

MOD's Colo by the 'U' solution enables companies to customize their Colocation requirements from 1U on up, eliminating the need to overbuy space for gear not in use. With MOD's Colo by the 'U', customers can stop paying for unused cabinet space and start paying only for what they need. Our flexible Colo by the 'U' solution allows customers to meet their technology needs today, while enabling them to scale readily and cost-effectively in order to meet the business needs of tomorrow.

## Redundant Facilities for Your Mission-critical Infrastructure

MOD works with data center operators around the globe to provide its customers with only the highest level of quality, security, redundancy, space, power density, capacity and availability for their online applications. MOD's Colocation customers also benefit from access to diverse network connectivity and even faster turn-up of services.

MOD is your single-source provider of comprehensive Colo by the 'U', offering expert support from initial racking of equipment, through installation, testing, turn-up and ongoing management on one single bill. We also ensure maximum uptime and redundancy through one central, highly efficient Network Operations Center (NOC).

## A Simple Colocation Solution That is:

- Cost-competitive
- Flexible
- Scalable
- Globally Available in 87 locations throughout 55 Major Markets
- Single-Source Provider
- Data Center-Neutral

## About MOD Mission Critical

MOD Mission Critical is a network service provider that combines facilities and non-facilities-based assets to deliver comprehensive, mission-critical network solutions. The company offers a full-suite of network services, including wholesale IP, international private lines, submarine cable capacity, layer 2-network access, and layer 3 network solutions across the world. Its own facilities-based network coverage area is available in over 30 markets.
